Engineered to protect. Designed to disappear.

Introducing Silhouette...

finally a smoke alarm that looks good enough for your living space.

Innovative Low Profile Silhouette Smoke Alarm

Conventional Smoke Alarm
Up to 2.0" installed

Silhouette Smoke Alarm
Less than 0.5" installed

You've put so much attention into all the details, you don't want a smoke alarm to ruin it.

Silhouette is an innovative, low-profile smoke alarm. Its unique, square shape protrudes less than half an inch from the ceiling, allowing it to effortlessly blend in with its surroundings. The Silhouette's alarm sensor and other components fit neatly into your electrical box. Silhouette marks the first dramatic evolution of the smoke alarm since their creation.

Silhouette uses the same trusted, high-quality technology as Kidde's other ionization smoke alarms – and we stand behind it with our 10-year warranty. Like all Kidde smoke alarms, the Silhouette smoke alarm has the approval of Underwriters Laboratories (CUL).

Why you'll love the new Silhouette smoke alarm

Homeowners will love the Silhouette smoke alarms for their sleek design and self-charging maintenance-free battery.

Builders and contractors will love that customers aren't greeted with low battery chirps when they move into their new home. Silhouette alarms save time, money, and hassle for you and your customer.

Engineered to Protect.

You've put so much attention
into all the details, you don't
want a CO alarm to ruin it.

Silhouette is an innovative, low-profile carbon monoxide alarm that mounts into your standard 2-gang electrical box and protrudes less than 3/4 of an inch from the wall. The Silhouette contains a sealed rechargeable lithium battery that does not need to be replaced for the life of the alarm.

Silhouette uses the same trusted, high-quality technology as Kidde's other electrochemical carbon monoxide alarms – the world's most accurate CO sensor technology. Like all Kidde carbon monoxide alarms, the Silhouette has been approved to the latest standards (CSA 6.19-01). It's backlit digital display provides accurate and continuous display of CO levels to warn you before harmful CO levels arise.
