Dear Mr. Sharp

RE: Fralo Plastic Septic Tanks - Approval to Use in Nova Scotia

Further to a telephone inquiry on April 23 and 24, 2007, from Mr. Blair Murphy of Thornes, a supplier of Fralo Products, regarding the use of Fralo tanks as holding tanks in the province, we wish to confirm the following.

In May of 2005, Fralco Plastech Manufacturing was added to our approved list of Septic Tank Manufacturers.

This letter will clarify that Fralo septic tanks and holding tanks are approved for use in the Province. The use of these products must be in accordance with the requirements of the *On-site Sewage Disposal System Regulations (2007)*, the *On-site Sewage Disposal Systems Technical Guidelines* and the conditions specified in the CSA approval for the tanks.

If you have any questions, please contact Steve Westhaver in our Central Regional office, Bedford at (902) 424-8183.

Regards,

Christine Penney
District Manager
