

## INTRODUCTION

Our unique Wireless Water Alarm System with Auto Dialer will provide you with early warning before water damages occur. Choose a location where water damage may occur to install the wireless water sensor, and a desired location for the auto-dialer. The auto-dialer is in ARM mode. Once water is detected, the auto-dialer will turn on the built-in siren and dial out the pre-programmed telephone numbers one by one, for a pre-programmed cycle. You can set the auto-dialer to chime mode, you will hear one chime only when water is detected.

## IMPORTANT SAFETY TIPS

- Do not install the system where it will be exposed to direct sunlight or rain.
- The built-in siren is very loud, never put the system close to your ear.
- The system should be installed away from heat sources such as radiators, heating ducts and stoves.
- If the system sounds at random, it is possible that the installed location is too close to a heat source, changing the location or direction of the unit can correct the problem.
- The system will provide early warning protection for your home and property from water damage if you use it properly. However, this system cannot guarantee protection against water damages. Therefore, we will not be responsible for any losses or damages occurred during use of this product.

- Chime ON/OFF switch
- Built-in 105-dB siren with programmable siren sound on/off

## TO DISARM THE SYSTEM

- Enter password followed by the DISARM button.
- You will hear one beep and the ARM icon will disappear from the auto-dialer screen to confirm that the Auto-Dialer has been DISARMED.

## DOOR CHIME ON/OFF

- Switch the CHIME button to ON.
- Wait for 60 seconds, there will be one beep.
- When water is detected in the protected area the chime will sound only once.
- Switch the CHIME button to OFF to stop the chime from sounding.

**NOTE:** When the auto-dialer is in ARM mode the CHIME will NOT sound no matter what position the CHIME switch is in.

## 5. PANIC BUTTON

- Press "PANIC" button on auto-dialer, the ALARM will sound instantly for 30 seconds, then off for 30 seconds again for 30 seconds and then off, and the auto-dialer will begin the stored numbers.
- To stop the alarm sound and the dialing. Enter password then press ARM/DISARM button.

## PAUSE FUNCTION

The "PAUSE" function can be stored as one digit in the telephone number memory for some dialing operations. Every one PAUSE in the memory dialing sequence will stop for 3.6 seconds. For example, if you want to store telephone number 514-363-1030 EXTENSION 230 to memory location 2, the operation will be as following:

- Enter password then press PROG button, now the auto-dialer is in set-up mode.
- Press PROG button once to select MEMORY function.
- Press ARM/DISARM button to confirm.
- Press \*UP or #DOWN button to select memory location 2.
- Enter 5143631030, PAUSE, 230.
- Press ARM/DISARM button to confirm.
- Press PROG button six times to exit set-up mode.

## BATTERY LOW LED INDICATOR

When the Battery Low LED flashes once every 3 seconds, it indicates that the battery power in auto-dialer is running low. Change the battery immediately. Failure to do so may cause false alarm when water is detected.

## VIEW FUNCTION

**View Triggered Events**  
If alarm has been triggered it will flash on the LED screen. To view, in standby mode, press #DOWN button to view the last 5 triggered events. Once viewed trigger will disappear.

**View stored telephone numbers**  
In standby mode, press \*UP to view stored telephone numbers.

**NOTE:** If no buttons are pressed for 10 seconds, the auto-dialer will automatically exit view mode.

## TROUBLE SHOOTING GUIDE

- AUTO-DIALER WILL NOT ARM/DISARM**
  - Make sure you've entered the correct password, if not, re-enter the password.
  - If it still doesn't work. Perform the password reset following the instructions in section "CHANGE PASSWORD" to reset the auto-dialer.

- Expandable wireless system, up to 8 compatible wireless sensors can be connected. You can also purchase additional water sensors. (SK616)
- Two External Trigger Input Terminals, compatible with wired magnetic sensor (SK619), and wired water sensor (SK606). They can be purchased separately.
- AC adaptor optional (included) with 9V battery back-up (included)
- Wall mountable, mounting hardware included

## INSTALLATION

- Remove the screws from battery cover of main unit, install 9V battery. This is a back-up battery. This battery will keep the unit working in case of power failure. (Fig. 1)

- Plug in the external antenna into the antenna jack (Fig. 2). The antenna should be vertically straight up for better reception. Straighten the antenna if it's bent.
- The supplied telephone line splitter should be installed into your telephone wall socket. (Fig. 3a) or the LINE Jack of the auto-dialer (Fig. 3b).
- Now using the telephone wire supplied, insert the small clear plug into the LINE jack on the auto-dialer and the other end into the telephone line splitter. (Fig. 3a) or insert your telephone line splitter into LINE Jack of main unit, then telephone wire supplied into wall socket. (Fig. 3b)
- Your existing telephone line can now be inserted into the telephone line splitter. (Fig. 3a/b)
- Connect the AC adaptor to the DC 9V jack on the auto-dialer. (Fig. 3c)

- Connect the Telephone Line Socket to the Telephone Line Socket. (Fig. 3a)
- Connect the Telephone Line Socket to the Telephone Line Socket. (Fig. 3b)

- Connect the DC 9V Adaptor to the DC 9V Jack on the auto-dialer. (Fig. 3c)
- Mount the auto-dialer where convenient, place the auto-dialer over the screws and slide it down to secure it in place (Fig. 4).

- Mount the auto-dialer where convenient, place the auto-dialer over the screws and slide it down to secure it in place (Fig. 4).
